Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:
- ☐ the entire international application,
 - ☒ claims Nos. 18,19 with respect to IA
because:
 - ☒ the said international application, or the said claims Nos. 18,19 relate to the following subject matter which does not require an international preliminary examination (specify):
see separate sheet
 - ☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):
 - ☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.

REPORT ON PATENTABILITY
(SEPARATE SHEET)**

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 18 and 19 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

- D1: WO 01/57036 A (MARFAT ANTHONY ;PFIZER PROD INC (US); CHAMBER ROBERT JAMES (US)) 9 August 2001 (2001-08-09)
D2: DATABASE CHEMCATS Chemical Abstracts Service, Columbus, Ohio, USA; XP002253965

Novelty and Inventive step

The document D1 is regarded as being the closest prior art to the subject-matter of claims 1-22 and 24, and has been acknowledged in the description. D1 also describes nicotinamide derivatives useful as PDE4 inhibitors.

The present compounds differ structurally very much from the ones of this known document D1 (eg a benzofused-heterocyclyl moiety in D1 in stead of the tetrahydro-thiopyran-4-yl moiety of the present invention) and are therefore novel.

The intermediates according to claim 23 were not found in the available prior art documents. D2 discloses a compound which is structurally different in the group R². Therefore novelty is recognised for these intermediates.

The subject-matter of claims 1-24 (compounds, their pharmaceutical use, processes for their preparation, and intermediates) is consequently new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as the provision of further compounds which can be used as PDE4 inhibitors.

The solution to this problem proposed in the present claims is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/IB2004/002380

From the prior art documents there were no incentives for replacing a benzofused-heterocyclyl moiety as known from D1 by the tetrahydro-thiopyran-4-yl moiety of the present invention. Moreover the present moiety R² has a specific meaning unknown from the available prior art documents.

The intermediates of claim 23 contribute to the structural differentiation of the end-products over the state of the art D1 and D2 and an inventive step can be recognised for this claim 23 as well.

Industrial applicability

The present compounds are useful as PDE4 inhibitors.

For the assessment of the present claims 18 and 19 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

Re Item VIII

Certain observations on the international application

Claims 8-10 contain references to the examples in the description. According to Rule 6.2(a) PCT, claims should not contain such references except where absolutely necessary, which is not the case here.

Claim 11 comprises all the features of claim 1 and is therefore not appropriately formulated as a claim dependent on the latter (Rule 6.4 PCT).
